PROFESSIONAL SUMMARY

Aspiring Machine Learning Engineer with 2+ years of experience building and deploying predictive models. Proficient in Python, machine learning, and deep neural networks using TensorFlow. Passionate about data processing, statistical analysis, and optimizing model training pipelines. Strong collaborative skill set under Agile frameworks.

WORK EXPERIENCE

Junior ML Developer | TechSolutions Inc.

June 2024 - Present

- Built and deployed machine learning models using Scikit-Learn and Pandas for customer churn prediction.
- Designed deep neural networks using TensorFlow and Keras to classify image datasets, improving accuracy by 10%.
- Engineered data ETL pipelines in SQL and Python to process 500k records daily, speeding up reporting by 25%.
- Utilized Git and GitHub for version control and collaborative development within an Agile/Scrum team.

ACADEMIC & PERSONAL PROJECTS

AI Semantic Search Engine

- Developed a semantic search application using Hugging Face transformers and Python.
- Evaluated text representations using cosine similarity to retrieve relevant text passages based on user queries.

Automated Document Classifier

- Implemented natural language processing (NLP) tokenization and text analysis to filter spam text messages.
- Utilized Flask to build web APIs, serving model inferences with sub-100ms response times.

EDUCATION

B.S. in Computer Science | State University

Graduated: May 2024

GPA: 3.8/4.0 | Focus: Software Engineering & Data Analysis

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript, HTML, CSS, Bash

Libraries & Frameworks: TensorFlow, Keras, Scikit-Learn, Pandas, NumPy, Hugging Face, Flask

Tools & Methodologies: Git, Agile, Scrum, ETL, REST APIs
